

TWIGS

(Teams With Intergenerational Support)

Curriculum for teachers, volunteer leaders, and agency staff, focusing on Gardening and Nutrition.

This curriculum package includes 30 field tested lessons connecting gardening with nutrition for children in kindergarten through sixth grade. The focus is on positively influencing participant's nutritive choices through the development and harvesting of a vegetable garden.

Each 1 1/2 hour activity follows the same format of providing rationale, helpful information, step by step guidance and extensions. Lessons are flexible, meant to be selected based on interests, timing of project, and available materials. Nearly all lessons include a handout suitable for reproducing. Many original illustrations are included.
